One-stop shop for Auto-ID solutions

Now there is a one-word solution to Automatic Identification Labelling, Item Tracking, Inventory Management and Control in a wide spectrum of industries - Specgraph.

Specgraph launched Barcoding in 1993. The company is one of the leading names in India for providing complete identification and data capturing systems through bar coding. The Specgraph footprint covers a wide range of businesses in retail, exports and manufacturing, catering to more than 1000 clients. The company efficiently addresses their concerns in warehousing, dispatch management and Work-in-Progress tracking. Today the cutting edge solutions package includes in-house printing and scanning of barcode labels to processing of the scanned data for Management Information Systems. Honeywell, Zebra Technologies-USA, and all world leaders - are amongst the principals of Specgraph. Specgraph has the added distinction of being amongst the few accredited Barcode System Solution Providers recognized by GS1 India under the Ministry of Commerce, Government of India.

We, at Specgraph are committed to provide cost effective and meaningful solutions to our clients. Our emphasis is on problem solving and solution selling as opposed to box-selling. With the drive of a highly dedicated team of software and hardware professionals, we are India's one of the fastest growing companies in the field of Auto-ID and Barcode Tracking.

Specgraph is an active member of leading industry associations in India, and worldwide - GS1 INDIA, AIM INTERNATIONAL AND AIDC ASSOCIATION OF INDIA.

Efficiency and Productivity in Supply Chain Management

Barcodes have been instrumental in revolutionizing, and significantly increasing efficiency and productivity across the entire supply chain from manufacturers to distributors to retailers worldwide.

Today, the demands placed on warehouse and distribution operations are greater than ever. Companies now see an efficient supply chain as a critical competitive advantage, and as a result are requiring greater supply chain visibility and velocity. The well-run warehouse must be equipped with the latest solutions to meet these needs.

Our warehouse solution puts real-time order and inventory information at your fingertips to help meet delivery demands while reducing operating costs. Our rugged hand-held and vehicle-mount mobile computers provide mission-critical reliability for demanding warehouse environments, including refrigerated cold storage facilities, all using wireless networking.

Applications :

- Identifying Products
- Managing Work-In-Process
- Controlling Inventory
- Wireless Data Management
- Asset Management
- Shipping & Receiving
- Tracking Consignments

Manufacturing Warehousing & Distribution

**Capturing Data on the move

Solutions for Utilities

Govt. Utilities

Day-to-day governance generates highly sensitive classified data; were such data to get into unauthorised hands, it could spell disaster. Specgraph offers unique 'horses for courses' solutions that fully satisfy the stringent requirements of Government Agencies, Utility bodies like Electricity, Water, Tax Collections, etc.

Government organizations around the world face the need to drive higher efficiencies and responsiveness in their various departments. Whether in civilian or military operations, Barcode solutions enable Governments to deliver services more effectively:

We can offer a wide range of Barcode solutions from supply chain to field operations.

Healthcare Management

"Hospitals, clinics and care centres can be chaotic since a phenomenal amount of patient data is generated. Unless such data, which is also highly confidential, is properly documented and stored, it will invariably be misplaced. There is also the risk of the information falling into wrong hands.

Specgraph offers comprehensive and across-the-board barcode solutions. Files and data can be instantly accessed anywhere in a hospital. There is no fear of data loss any more. Archiving records too, becomes easier and more efficient. Chances of wrong treatment and administration of incorrect dosages is thus minimised.

Cold Storage

Living Up to the Demands of Cold Storage Environments Cold storage and refrigerated warehouse operations with low-temperature condensing environments offer unique challenges when implementing a Barcode solutions. Our robust solutions for the cold chain industry are designed with these challenges in mind.

Suppliers of temperature-controlled logistics must meet increasing demands for cost efficiencies and smaller, more frequent just-in-time deliveries. Our Barcode solutions and network of partners put data in the hands of the workers, allowing logistics businesses to meet the demands for increased efficiency and improved productivity.

Application:

- Refrigerated Warehouse Solutions
- Frost-Free Scanner Solution

RFID... The Future

Intelligent Tracking RFID

Whether you're tracking pallets from a warehouse, picking individual items from inventory or counting merchandise remaining on a store shelf, radio frequency identification (RFID) technology offers an exceptional level of ease and efficiency. With no line-of-sight reading limitation, plus the ability to read multiple tags simultaneously, RFID can speed data capture at any point in the supply chain. RFID, hence, is truly a technology of the future.

The Specgraph Technology Shield

To meet demanding client requirements Specgraph continuously upgrades its package of solutions. The company has stitched together technological collaboration agreements with the world's best.

Honeywell Productivity Solutions provides comprehensive solutions that enhance workplace safety and incident response, improve enterprise performance and enable greater product design innovation. Customers rely on our connected solutions to provide real-time safety intelligence, increase worker productivity and enrich operational intelligence with data-driven insights. Honeywell serves customers in the automotive, field service, healthcare, logistics, manufacturing, oil & gas, power and utilities and transportation markets.

NEDAP, Netherlands, is the world's one of the largest Radio Frequency - Electronic Article Surveillance (RF EAS System) Company. For more than 60 years, Retailers and Libraries around the world have relied on them for protecting their inventory. The company has earned a reputation for technological innovations such as paper-thin, disposable security labels and non contact deactivation.

ZEBRA Technologies is a leading global provider of rugged and reliable speciality printing solutions including on-demand thermal barcode label receipts printers, plastic card printers, Embedded / Kiosk printers, (RFID) smart label printers/excodus and certified smart media. It also is a major global player in the field of barcoding, data capture and mobile computing. ZEBRA Technologies has a complete range of data collection devices suitable for retailing, transportation & distribution logistics, manufacturing & other industries. The company has one of the largest customer-base worldwide.

An unmatched spectrum of service

Specgraph believes a relationship only begins after the sales. A customer just has to call to access Team Specgraph. The team comprises highly skilled, experienced and certified and technicians who provide a whole gamut of services. This includes:

- Installation & Training
- Integration services to enable seamless integration of solutions to existing information systems platforms.
- Software applications development that spans the supply chain from manufacturing to distribution to retail.
- On-going and cost effective after-sales-service support for trouble free operations.
